

## PAIN FREE PROGRAM

Dear Valued Client,

The doctors and staff here at Peppertree Veterinary Clinic care not only about the care and comfort your pet receives here at our facility, but also about their care and comfort once they are discharged and back at home with you.

Over the last few years we have been learning through research that pain can inhibit healing in both humans and animals! Even though your pet may have a higher threshold for pain than you do, they still experience it to a great degree. Although your hugs and kisses are wonderful therapy for their hearts, we now have a state-of-the-art medication regularly prescribed for humans by their physicians that is great for their hurts as well!

Finally technology in veterinary medicine has expanded to such a level that the F.D.A. has approved this medication for use in small animal procedures to relieve pain and discomfort. Your pet will receive an injection post-surgically to see you through the first couple of days at home.

We believe that pain relief is very important in both humans and animals, and that is why we specialize in Pain Free procedures.

I have read and understand the above information.

The cost is \$\_\_\_\_\_ for dogs and \$\_\_\_\_\_ for cats.

Yes, I accept \_\_\_\_\_ No, I decline \_\_\_\_\_ Date \_\_\_/\_\_\_/\_\_\_
